RIGHTS WORLD

A touching story of two friends, a Venus Flytrap and a Monstera!

Venus Flytrap is a special plant which lives in a peaceful forest.

She is an egoistic narcissist in her own little world.

Every little creature in the forest is fascinated by her scent, especially for insects so they are caught in the fragrant trap and eaten by her.

Venus trap absorbs nutrition from quarries and it makes her more beautiful. She has pride in her beauty.

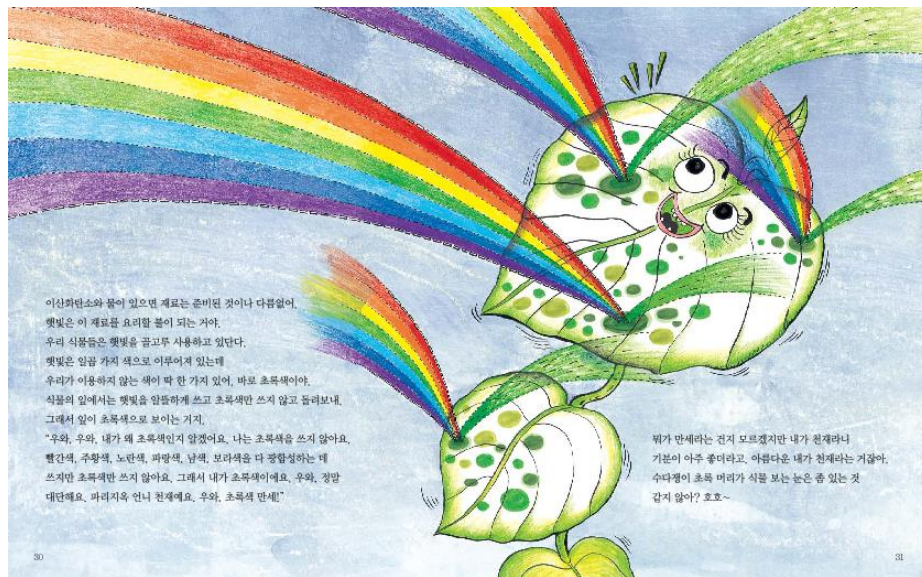

But one day, a little Monstera bean comes up in front of her all of sudden, so that their friendship starts.

Even though the Venus Flytrap has a short span of life, her devotion is touching, that reminds a value of life.

And her sacrifice shows a main principle that death, like birth, a secret of life.

This story shows laws of nature, the circulation from growth to rebirth with death.

<Never Ending Science Picture Books Series> is written by a scientist, Ji-yu Lee, with creative stories and biological principles.

In the friendly story, children can learn about principles which are hard to explain such as photosynthesis and food chain.

Special science picture book with explanation in detail and exquisite illustration!
