**A thought-provoking story of an elephant who just wants to exist in nature as it is.**

A message from the nature directed to the reader, inviting us by clear descriptions of a herd of wild elephants. Here is an elephant dreaming of living in agreement with nature. Even though there are loads of things that he can't deal with, he can do something like climbing a high mountain, feeling the fresh breeze, and helping friends.

The author shows a herd of wild elephants living in nature with restrained coloured illustrations in contrast to texts describing animals being exploited.
